

A Personal Security Communicator that goes everywhere you go.

Automatically initiates assistance should you fall

SOS button
GPS locator

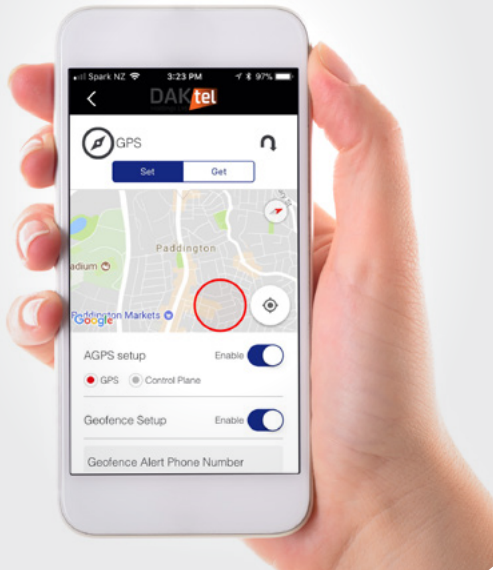

Make and receive calls anytime, anywhere there is 3G coverage

✓ Keep your independence with confidence

✓ Wherever you are, help is never far away

Simple set up via smartphone app.

Carer set up

Configure your options before passing to the user:

- > Set up SOS contact numbers and message
- > Create virtual boundaries
- > Professional monitoring if required
- > Enable battery warnings (alert to carer via the App)

SOS button

Large SOS button initiates a call to a pre-determined number – friend, family member or a Professional Monitoring Service and sends a message with your GPS location.
