Access Network	Telstra			
Once Off Connection Charge	\$99			
Total Minimum Cost Over Minimum Term	\$519		\$603	
Minimum Term	12 Months			

*Unused call time expires each month.

Information about this service

The DX-9mw Watch is a lightweight personal emergency response device, that connects directly to Daktel's 24/7 dual Grade A1 Monitoring Centres. The watch enables two-way 'SOS' voice communication for immediate contact with responders during emergencies. It offers optional fall detection and uses advanced ten-fold positioning technology for accurate location tracking, even indoors.

With an IP68 rating, the watch can be worn in the shower. Upon SOS alarm activation, the Monitoring Centre can access key health metrics such as heart rate, blood pressure, oxygen levels, and body temperature, which may assist in prioritising ambulance dispatch.

Accessories

A locking clasp watch band is available for purchase. This band is ideal for users with dementia or Alzheimer's, as it is difficult to remove the watch without the provided unlocking tool. If ordered with the watch, the clasp will be pre-installed for your convenience.

Equipment & Setup

The watch comes pre-programmed and ready for use after an initial battery charge. A simple setup guide is included. Watch rental is part of your Minimum Monthly Charge. If the service is cancelled, the watch

must be returned in clean condition and good working order, excluding fair wear and tear.

Calling Features

All plans support inbound calls. On select plans, the watch can make outbound calls, like a regular mobile phone, to up to five pre-set contacts, such as family or friends. Any changes to these contacts made through our service desk will incur a \$5 service fee.

International Outbound Calling & Roaming

Not available. This service is intended for use within Australia only.

Mobile Number Portability

Phone number porting is not supported.

Plan Changes

Some plan changes may require replacing the watch's SIM card and getting a new phone number (see Billing & Fees).

Emergency Contacts

You must register details with us for two emergency contacts who have agreed to be contacted by us to assist anytime (24/7) if the wearer requires help.

Maintenance/Support Contact(s)

You must register with us a support contact to receive email notifications for device-related issues, such as low battery or the watch being offline.

Always On

The watch is continuously monitored and should always remain powered on. The wearer should remove and recharge the watch each night at their bedside, ready to wear it again when they get up.

Property Access Details

You can register key safe or lock box details with us to assist paramedics in accessing your home. Any other necessary information (such as those for shared complexes like apartment buildings) should be registered directly by you or your community/building manager with the local ambulance service.

Emergency Contacts should also be aware of any necessary property access details for the wearer's home or other locations where they are staying.

No Voice Contact

If the Monitoring Centre cannot establish verbal communication with the wearer upon an SOS alarm activation, only Emergency Contacts will be notified, along with tracking details (if available). Emergency Contacts are responsible for rendering help and requesting emergency services. The Monitoring Centre cannot directly dispatch emergency services if verbal contact is not established.

Network Availability & Congestion

This service is delivered using the Telstra 4G mobile network, which may not always be available and is subject to change by the Network Operator. We cannot guarantee that the watch can always connect to the mobile network. You should check the coverage before purchasing this service. Please get in touch with us if you require assistance with this.

Location Tracking Limitations

The watch uses various technologies to provide location data with an accuracy of approximately 5 meters. However, signals can be impeded in some areas, so we cannot guarantee the device will always be able to show an accurate location, and the wearer must be mindful of this.

Consumer Device Failures

The DX-9mw is a consumer electronic device ("Consumer Device") designed for your convenience, offering valuable features for daily safety and monitoring. While it is not classified as an AS4607 Personal Emergency Response standards device, it provides comparable and reliable support on a best-efforts basis.

Billing & Fees

Your plan will automatically start billing upon dispatch of the watch. Accounts are billed monthly in advance, so your first invoice will include a pro-rata amount for the balance of the current billing period. In addition to the monthly charge, you may pay the following charges:

- *Call Charges* - calls to numbers not included in your plan.
- *Delivery Fee* - \$19 for shipping and handling for any new/replacement equipment.
- *Paper Bill Fee* - \$2.20 for each paper bill posted. Alternatively, if you don't use eMail, you can specify a friend or family member's eMail instead with us.
- *Late Payment Fee* - \$10 for each bill not paid by the due date
- *SIM Card Replacement Fee* - \$10
- *Unreturned Equipment Fee* - \$299 for damaged equipment or not returned within 21 days of cancellation.

Obtaining Usage Information

To access information about your expenditure and usage, please log into your account at myaccount.myhomefone.com.au

Cancelling Your Plan

Early Termination Fee (ETF) and Clawback Charges may apply when you cancel your service within the minimum term.

Fair Use

This service is subject to our Fair Use Policy, which sets out rules for the reasonable and lawful use of our service. If you choose not to follow the directions in the policy, for example, excessive SOS alarm activations or using your plan fraudulently, we can take the actions mentioned in the policy.

Dispute Resolution & Complaints

If you are unhappy with us or your service, please contact our Customer Service Team first. We would love to help where we can. If you wish to make a formal complaint, please refer to our Complaint Handling Policy, available on our website, to contact our specialist complaint resolution team.

If you are still unhappy, you can call 1800 062 058 to seek complaint mediation or further assistance from the Telecommunications Industry Ombudsman.
